Cover design by Joe Meiring

This publication was developed by Management Sciences for Health's Center for Pharmaceutical Management, Arlington, Virginia. The *Guide* is updated annually. The explanatory notes are in English, French, and Spanish and the products and prices are in English. Comments and questions should be e-mailed to [cpm@msf.org](mailto:cpm@msf.org).

**Note:** All rights reserved. Published by Management Sciences for Health (MSH) on its own behalf and for the World Health Organization (WHO). MSH and WHO have made every effort to ensure the accuracy of price, supplier, procurement agency and other information presented in this publication. However, the reader's attention is drawn to the introduction, which describes the specific sources and limitations of information provided in this publication.

The reader's attention is also drawn to the importance of quality assurance for pharmaceutical products. Licensing authorities in the respective countries of manufacture are responsible for the review and approval of the detailed composition and formulation when authorizing a pharmaceutical product to be marketed, including the specifications of its ingredients, as submitted by the manufacturer of the dosage form, and to oversee compliance with Good Manufacturing Practice requirements as recommended by WHO.

MSH and WHO do not warrant that the products mentioned are in accordance with the national laws and regulations of any country, including but not limited to patent laws. It is recommended that readers intending to use this publication familiarize themselves with issues such as quality, safety and efficacy as well as quantification, patents, financial stability and standing of the supplier, ability to supply the required quantities, delivery time, and other related aspects.

This publication does not constitute an endorsement or warranty of the fitness of any product for a particular purpose. This publication is not based on an active assessment of, and does not therefore constitute an acceptance or recommendation in regard to, any product's quality, safety, or efficacy.

This list may not be used by manufacturers and suppliers for commercial or promotional purposes. The mention of specific companies and certain of their products does not imply that they are recommended by MSH and WHO in preference to others of a similar nature that are not mentioned. Errors or omissions excepted, the names of proprietary products are distinguished by initial capital letters.

Bearing in mind that the data and information provided for a product depend largely on the supplier or procurement agency, these data and information are being provided as is, and MSH and WHO make no representations or warranties, either express or implied, as to their accuracy, completeness, or fitness for a particular purpose. MSH and WHO accept no responsibility or liability for the reliance on, or use of, such data and information.

**Nota:** Todos los derechos reservados. Publicado por Management Sciences for Health (MSH) por cuenta propia y para la Organización Mundial de la Salud (OMS). MSH y la OMS han realizado todos los esfuerzos necesarios para asegurar la exactitud de los precios, proveedores, agencias de adquisiciones y otra información presentada en esta publicación. Sin embargo, se llama la atención del lector a la introducción que describe las fuentes específicas y las limitaciones de la información proporcionada en esta publicación.

También se llama la atención del lector a la importancia del aseguramiento de la calidad para los productos farmacéuticos. Las autoridades responsables de otorgar licencias en los respectivos países de fabricación son responsables de la revisión y aprobación de la composición y formulación detallada al autorizar un producto farmacéutico para su comercialización, incluyendo las especificaciones de los ingredientes, de acuerdo con la información suministrada por el fabricante, así como de supervisar el cumplimiento con los requisitos de las Buenas Prácticas de Fabricación recomendadas por la OMS.

MSH y la OMS no garantizan que los productos mencionados están de acuerdo con las leyes y regulaciones nacionales de ningún país, incluyendo pero no limitándose a las leyes de patentes. Se recomienda que los lectores que tengan la intención de utilizar esta publicación se familiaricen con los aspectos relativos a la calidad, seguridad y eficacia así como la cuantificación, los patentes, la estabilidad financiera y la situación del proveedor, su habilidad para suministrar las cantidades requeridas, el tiempo de entrega y otros aspectos relacionados.

Esta publicación no constituye un respaldo o garantía con respecto a la idoneidad de cualquier producto para un fin en particular. Esta publicación no está basada en una evaluación activa y por lo tanto no constituye una aceptación o recomendación con respecto a la calidad, seguridad o eficacia de cualquier producto.

Esta lista no puede ser utilizada por los fabricantes y proveedores para fines comerciales o promocionales. La mención de empresas específicas así como ciertos de sus productos no implica que estos están recomendados por MSH y la OMS con preferencia sobre otros productos de naturaleza similar que no hubieran sido mencionados. Salvo por errores u omisiones, los nombres de los productos comerciales se distinguen con una letra mayúscula inicial.

Teniendo en mente que los datos y la información dados para un producto dependen en gran medida del proveedor o de la agencia de adquisiciones, estos datos e información se suministran tal cuál están, y MSH y la OMS no realizan ninguna declaración o garantía, ya sea expresa o implícita con respecto a la exactitud, integridad o idoneidad para un propósito en particular. MSH y la OMS no aceptan responsabilidad alguna por la confianza depositada o el uso de dichos datos e información.

**Note:** Tous droits réservés. Publié par Management Sciences for Health (MSH) pour son propre compte et pour l'Organisation mondiale de la Santé (OMS). MSH et l'OMS ont cherché dans la mesure du possible à vérifier l'exactitude des données sur les prix, les fournisseurs, les organismes d'achat et des autres informations présentées dans cette publication. Le lecteur n'en est pas moins prié de se rapporter à l'introduction qui décrit les sources spécifiques et les limitations de l'information donnée dans cette publication.

Le lecteur doit également prêter attention à l'importance de l'assurance de qualité pour les produits pharmaceutiques. Les organismes chargés de la délivrance des autorisations dans les pays respectifs des fabricants sont responsables de l'examen et de l'approbation de la composition et formulation détaillées avant d'autoriser la mise sur le marché d'un produit donnée, notamment des spécifications des composants, tel qu'indiqué par le fabricant dans la présentation et doivent par ailleurs s'assurer que sont observées les Bonnes pratiques de fabrication recommandées par l'OMS.

MSH et l'OMS ne garantissent pas que les produits mentionnés soient conformes aux lois et réglementations nationales d'un pays donné, notamment les lois relatives aux brevets. On recommande au lecteur qui souhaite utiliser cette publication de se mettre au courant des divers aspects tels que la qualité, l'innocuité et l'efficacité ainsi que la quantifications, brevets, situation financière et réputation du fournisseur ainsi que sa capacité à fournir les quantités demandées dans les bons délais.

La présente publication ne constitue pas une approbation ou recommandation de l'efficacité d'un produit dans un but précis. Cette publication ne se fonde pas sur une évaluation active et ne constitue donc pas une acceptation ou recommandation de la qualité, innocuité ou efficacité d'un produit.

Cette liste ne peut pas être utilisée par des fabricants ou fournisseurs à des fins commerciales ou promotionnelles. Si certaines sociétés ou certains produits sont mentionnés, cela ne veut nullement dire qu'ils sont recommandés par MSH et l'OMS de préférence à d'autres de nature analogue qui ne sont pas recommandés. Sauf erreur ou omission, les marques déposées sont indiquées par des initiales en majuscule.

Sachant que les données et informations fournies sur un produit dépendent largement du fournisseur ou de l'organisme chargé des achats, lesdites informations sont donc données telles quelles, sans que MSH et l'OMS ne fassent aucune recommandation ou garantie, explicite ou implicite, quant à leur exactitude, intégralité ou adéquation dans tel but donné. MSH et l'OMS n'acceptent aucune responsabilité concernant la fiabilité ou l'utilisation des dites données et informations.

We thank MSH and WHO staff for their assistance with the *International Drug Price Indicator Guide*. We also very much appreciate the information and cooperation we receive from the suppliers included in the *Guide*. Finally, the tender data provided by government agencies around the world greatly enhances the usefulness of the *International Drug Price Indicator Guide*, and we thank the staff of the following organizations for their time and effort.

- Barbados Drug Service
- Botswana Public Procurement and Asset Disposal Board
- Bureau des Formations Médicales Agréées du Rwanda (BUFMAR) ("Office of Church-affiliated Health Facilities in Rwanda")
- Centrale d'achat des Médicaments Essentiels, Consommables et Equipements Médicaux du Rwanda (CAMERWA) ("Central Purchasing of Essential Drugs, Medical Consumables and Equipment in Rwanda")
- La División Médica, la Gerencia de Operaciones y el Departamento de Farmacoterapia de la Caja Costarricense de Seguro Social ("Costa Rica Social Security")
- Dominican Republic PROMESE/CAL ("Central Support Unit for the Essential Medicines Program")
- Ghana MOH Procurement Unit
- Mission for Essential Medical Supplies (MEMS), Tanzania
- Namibia Ministry of Health and Social Services
- Organisation of Eastern Caribbean States Pharmaceutical Procurement Service, St. Lucia
- Ministerio de Salud del Perú ("Ministry of Health, Peru")
- El Sistema de Integración Centroamericana (SICA) ("System of Central American Integration")
- South Africa Department of Health
- Sudan National Health Insurance Fund

# GUIA INTERNACIONAL DE INDICADORES DE PRECIOS DE MEDICAMENTOS

# Prólogo

La *Guía Internacional de Indicadores de Precios de Medicamentos* provee exactamente lo que el nombre implica—una indicación de precios de medicamentos en el mercado internacional. Management Sciences for Health publica esta *Guía* desde 1986, y en colaboración con la Organización Mundial de la Salud (OMS) desde el 2000. La *Guía* proporciona una gama de precios ofrecidos por proveedores de medicamentos sin fines de lucro y agencias de adquisición comerciales, basándose en sus catálogos o listas de precios actuales. También contiene precios obtenidos de agencias internacionales para el desarrollo y de agencias gubernamentales.

MSH, en colaboración con la OMS, está trabajando con sus asociados para que la información sobre precios de medicamentos se divulgue más ampliamente con objeto de mejorar la adquisición de medicamentos de calidad garantizada, al precio más bajo posible. Esto contribuirá a un acceso equitativo a los servicios y productos de salud, incluyendo los medicamentos esenciales necesarios para la prevención y el tratamiento de las enfermedades prevalentes.

Debido a que el costo potencial de ofrecer una gama completa de tratamientos para enfermedades comunes es alto, los precios y el financiamiento son factores ineludibles en la determinación del acceso a medicinas esenciales. Pueden obtenerse precios más bajos mediante compras de volumen, la competencia, negociaciones hábiles y una administración inteligente de las existencias. La información comparativa de precios es importante para obtener el precio más bajo. Esta información ayuda a negociar precios, a localizar nuevas fuentes de suministro y a evaluar la eficiencia de los sistemas de adquisición locales.

La *Guía Internacional de Indicadores de Precios de Medicamentos* ayuda a los funcionarios encargados del suministro de medicamentos a determinar el costo probable de los productos farmacéuticos para sus programas. Se puede usar como una lista de referencia para comparar los precios actuales con los disponibles en el mercado internacional; también se puede utilizar para evaluar el posible impacto financiero de los cambios en las listas de medicamentos.

La base de datos sobre precios es mantenida por el Centro de Gestión Farmacéutica de Management Sciences for Health, organización sin fines de lucro, como una contribución para poner los medicamentos esenciales al alcance de todos los ciudadanos del mundo. Se puede copiar la *Guía* libremente para fines educacionales en el servicio u otro uso caritativo.

Se puede obtener información adicional sobre los precios internacionales de los medicamentos en la Web en:

- “Medicines Price Information” (<http://www.who.int/medicines/areas/access/ecofin/en/index.html>), página mantenida por la OMS. Incluye precios de servicios internacionales para información sobre precios de materiales para comenzar, materias primas y ciertos medicamentos relacionados con el VIH. Además, presenta información de precios de medicamentos para enfermedades específicas y servicios informativos sobre precios individuales por países.

Favor de tomar nota que se puede encontrar una versión electrónica de la *Guía Internacional de Indicadores de Precios de Medicamentos* en el Centro de Recursos Electrónicos de MSH en <http://erc.msh.org>.

# Cómo Usar la Guía

La *Guía* comienza con una sección titulada “Información Que Usted Debe Saber”, que le ayudará a entender mejor los datos presentados en ella. A esta le sigue una lista de los proveedores y compradores mencionados en esta edición y incluye detalles sobre condiciones de embarque y restricciones. También se dan las direcciones. Después, la *Guía* pasa a explicar el formato de los informes sobre comparación de precios, como también los términos usados en las listas de precios y los códigos y abreviaturas empleados.

En esta *Guía* se presentan datos sobre precios en tres formatos. Cada formato incluye los precios del proveedor y del comprador. Los precios del comprador son generalmente los precios de una agencia gubernamental a través de una licitación competitiva internacional.

- Lista I: Los medicamentos se clasifican en orden alfabético y por nombre genérico. Esta lista incluye los detalles sobre precios por cada proveedor y comprador. Este formato sirve para fines de referencia durante el proceso de adquisición, y permite hacer una búsqueda rápida de cualquier medicamento.
- Lista II: Los medicamentos se clasifican en orden alfabético siguiendo el sistema de clasificación de la Lista de Medicamentos Esenciales (LME) de la Organización Mundial de la Salud. Este formato ayuda a crear formularios y permite hacer una comparación conveniente de los medicamentos dentro de las distintas clases. Los productos en un mismo grupo no implica que son directamente sustituibles entre ellos.
- Lista III: Los medicamentos se clasifican por orden alfabético, mostrándose solamente el precio mediano por producto. El formato tiene por objeto facilitar la comparación de los precios del usuario con los precios de la *Guía*. Los precios del proveedor y del comprador están en listas separadas.

Si necesita información sobre cómo usar estos precios para fines comparativos, por favor vea la sección de esta *Guía* titulada “Cómo Analizar y Comparar sus Precios.” Además, a modo de referencia, en los Anexos se incluyen una lista de sinónimos y las categorías terapéuticas de la OMS.

El propósito de esta *Guía* es servir únicamente como una referencia para fines comparativos; no es apropiada para colocar pedidos de productos. Para hacer pedidos, es preciso ponerse en contacto directamente con el proveedor. No hay garantías implícitas en la lista en cuanto a la disponibilidad de los precios cotizados, la calidad de los productos o condiciones específicas de ventas. La lista de proveedores no es una lista completa de todos los proveedores potenciales. Los precios cotizados por los compradores se muestran para fines comparativos solamente.

# Información que Usted Debe Saber

## Conversión de precios

Los precios que figuran en la *Guía Internacional de Indicadores de Precios de Medicamentos* están en orden ascendente conforme al precio unitario. Todos los precios obtenidos por las organizaciones señaladas a continuación han sido convertidos a dólares estadounidenses. Los tipos de cambio utilizados son los que regían el 1 de julio de 2011 (<http://www.oanda.com>). Los demás precios del catálogo ya estaban originalmente en dólares estadounidenses, por lo que no se convirtieron.

| <b>Moneda (Codigo de agencia)</b>         | <b>Tipo de cambio (a \$EE.UU.)</b> |
|-------------------------------------------|------------------------------------|
| Cedi Nuevo de Ghana (GHANA)               | 0.6536                             |
| Chelín de Kenia (MEDS)                    | 0.0111                             |
| Chelín de Tanzania (MEDEOR/TZ, MEMS)      | 0.0006                             |
| Chelín de Uganda (JMS)                    | 0.0004                             |
| Dólar de Barbados (BDS)                   | 0.4917                             |
| Dólar de Namibia (NAMIBIA)                | 0.1441                             |
| Euro (IDA, MEDEOR/EU)                     | 1.4487                             |
| Franc de Rwanda (BUFMAR, CAMERWA)         | 0.0016                             |
| Libra esterlina (DURBIN)                  | 1.6057                             |
| Libra sudanesa (SUDANNHIF)                | 1.0235                             |
| Nuevo Sol de Perú (PERU)                  | 0.3601                             |
| Pesos de la República Dominicana (DOMREP) | 0.0261                             |
| Pula de Botswana (BOTSWANA)               | 0.1506                             |
| Rand sudafricano (SAFRICA)                | 0.1473                             |

Las fluctuaciones en los tipos de cambio pueden hacer variar considerablemente los costos. Siempre deberá usar el tipo de cambio más reciente cuando haga su análisis para calcular los costos de los medicamentos. Además, tome nota de que la comparación directa de los precios entre proveedores de un producto determinado tal vez no sea realista debido a las distintas condiciones y servicios ofrecidos por los diversos proveedores.

## Termos de precios

Los precios de proveedores y los precios de compradores que aparecen en esta *Guía* están basados en condiciones de precio diferentes, y por consiguiente no deben compararse en forma directa. Los Incoterms que siguen a continuación se usan para definir los tipos de precios:

- CFR (costo y flete): incluye cargos y flete hasta el puerto de destino (el transporte por agua solamente)
- CIF (costo, seguro y flete): incluye cargos por concepto de seguro y flete hasta el puerto de destino (el transporte por agua solamente)

- DAP (entregado en el lugar): El vendedor se hace cargo de todos los costes, incluidos el transporte principal y el seguro (que no es obligatorio) pero no de los costes asociados a la importación, hasta que la mercancía se ponga a disposición del comprador en un vehículo listo para ser descargado. También asume los riesgos hasta ese momento.
- DDP (entregado derechos pagados): incluye la entrega, los derechos de introducción y los costos de desembarque
- EXW (en fábrica): no incluye costos de carga, seguro o flete
- FCA (franco transportista): el vendedor realiza todas las transacciones y paga el transporte anticipadamente en el país de exportación
- FOB (franco a bordo): el precio de las mercancías en el punto de embarque, sin incluir los costos de seguro y flete (transporte)

Algunos proveedores y agencias imponen un cargo estándar por manejo, además del costo EXW o CIF. Los cargos por manejo indicados en las Fuentes de las Listas de Precios ya han sido añadidos a los precios cotizados en esta *Guía*.

## Cómo calcular los precios

Al calcular y proyectar los costos reales, es importante tener en cuenta factores tales como el financiamiento, el tiempo de entrega, los tipos de transporte (aire/mar/terra), y los cargos por manejo. El análisis de estos factores queda fuera del alcance y la intención de esta *Guía*. No obstante, para obtener un estimado, es razonable agregar del 10% por costos de embarque al precio cotizado por los proveedores en esta *Guía*. Los precios del compradores (obtenidos en licitaciones por las agencias de gobiernos) generalmente no requieren hacer ajustes por cargos de embarque.

## Garantía de calidad

Nosotros requerimos que todos los proveedores que figuran en la *Guía Internacional de Indicadores de Precios de Medicamentos* llenen un cuestionario sobre garantía de calidad. El propósito de llenar este cuestionario obligatorio es ayudar a asegurar que los precios cotizados en esta *Guía* provengan de proveedores de reputación con procesos de garantía de calidad debidamente instalados. Las 28 preguntas trata de asuntos como inspección, prueba, garantía de calidad, concesión de licencias, retirada de productos del mercado, procedimientos de control de calidad, estándares y documentación. Aunque este requisito brinda cierta garantía en cuanto a los procesos de control de calidad, no necesariamente garantiza la calidad de los productos ofrecidos. Se pueden obtener copias del cuestionario solicitándolas de Management Sciences for Health.

Las fuentes de los precios incluidas en la *Guía* han sido revisadas únicamente desde el punto de vista de la integridad de los documentos proporcionados. Esta revisión de ningún modo constituye un estudio a fondo de la calidad de los productos. Su inclusión en la *Guía* no necesariamente constituye una calificación previa o aprobación de ningún tipo por MSH y la OMS.

## Calidad de los productos

Los proveedores y agencias seleccionados para esta *Guía* no son fabricantes, pero sí ofrecen productos en relación con los cuales han indicado que cumplen con las normas internacionales de calidad especificadas por organizaciones como la Farmacopea de los Estados Unidos (USP), la Farmacopea Británica (BP) y la Farmacopea Europea (EP). Todos los proveedores declaran que las fábricas con quienes se trabajan mantienen normas de alta calidad mediante la incorporación en el sitio de sistemas de garantía de calidad con objeto de asegurar que todos los productos cumplan con las Buenas Prácticas de Manufactura (GMP por sus siglas del inglés) de la OMS y los reglamentos gubernamentales. Los certificados de calidad conforme al Plan de Certificación de la OMS sobre la Calidad de los Productos Farmacéuticos que se Mueven en el Comercio Internacional, se deben poder obtener solicitándolos de todos estos proveedores. Los proveedores y las agencias que figuran en esta *Guía* mantienen sus propios programas independientes de garantía de calidad. Comuníquese con ellos directamente para obtener detalles al respecto.

## Sistema ATC/DDD<sup>1</sup>

Los datos sobre la utilización de medicamentos desempeñan un papel muy importante en la calidad del ciclo de atención y son esenciales para administrar la política relacionada con el suministro, fijación de precios, costo y uso de los medicamentos. El sistema de clasificación anatómica-terapéutica-química (ATC) y la unidad de medida técnica llamada la dosis diaria definida (DDD) pueden proveer metodologías útiles para el seguimiento y la comparación de las tendencias en el costo, pero se deben usar con cautela. Basar el reembolso detallado, la fijación de precios de referencia de grupos terapéuticos y otras decisiones específicas sobre precios en las clasificaciones asignadas por el sistema ATC/DDD, es una utilización errónea del mismo.

El sistema ATC/DDD tiene por objeto servir de herramienta para investigar la utilización de medicamentos a fin de mejorar la calidad del uso de esos medicamentos. Uno de sus componentes es la presentación y comparación de las estadísticas sobre consumo de medicamentos al nivel internacional y a otros niveles.

Una de las principales aspiraciones del Collaborating Centre for Drug Statistics Methodology y Working Group de la OMS es mantener códigos de ATC y DDD estables con el transcurso del tiempo a fin de poder estudiar las tendencias en el consumo de los medicamentos sin la complicación de cambios frecuentes al sistema. Existe una renuencia muy grande a hacer cambios a las clasificaciones o dosis diarias definidas cuando esos cambios son solicitados por razones no relacionadas directamente con estudios del consumo de medicamentos. Por esta razón, el sistema ATC/DDD por sí solo no es apto para basar decisiones sobre reembolso, fijación de precios y sustituciones terapéuticas.

***La clasificación de una sustancia en el sistema ATC/DDD no representa una recomendación para su uso, ni tampoco ninguna determinación sobre la eficacia o eficacia relativa de los medicamentos o grupos de medicamentos.***

<sup>1</sup>El texto de esta sección fue tomado del sitio del Collaborating Centre for Drug Statistics Methodology de la OMS en la Web en <http://www.whocc.no/atcddd/>.

# Fuentes de las Listas de Precios

En la *Guía* se incluyen tres tipos primarios de proveedores y compradores.

1. **Proveedores** que mantienen un almacén y suministran productos directamente a los clientes. Todos estos proveedores ofrecen una mayor variedad de productos que los mostrados en esta *Guía*. Para ver una lista completa de los productos, comuníquese con el proveedor directamente. En la *Guía* se incluyen los proveedores siguientes:

| Proveedor                              | Código        | Fecha da la lista | Cargo por manejo | Tipo de precio        | Detalles                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------|---------------|-------------------|------------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Action Medeor                          | MEDEOR/<br>EU | enero 2011        | 1%               | EXW<br>Tönisvorst     | Los precios son válidos hasta que se publique una nueva lista de precios. Los costos de transporte se cargan individualmente de acuerdo con los gastos. Embalaje especial: Euro 26 por caja. Action Medeor cobra una comisión por manejo mínimo de Euro 50. Abastece solamente al mercado sin fines de lucro.                                                                                                                                                                                                                                                                                                                           |
| Action Medeor International Healthcare | MEDEOR/<br>TZ | septiembre 2011   | 0%               | EXW                   | Action Medeor International Healthcare es una agencia de compras sin fines de lucro, fundada en 2004, que pertenece a Action Medeor. Abastece al mercado sin fines de lucro (principalmente Tanzania) y no abastece a individuos o a farmacias comerciales. Se aplica un 3.5% de recargo por servicios a todos los clientes que no son de Tanzania para cubrir cobros bancarios y pérdidas por cambio de moneda. No se requieren cantidades mínimas.                                                                                                                                                                                    |
| Durbin PLC                             | DURBIN        | 2011-2012         | 0%               | EXW<br>United Kingdom | Durbin provee productos farmacéuticos e insumos médicos a médicos, farmacias, hospitales, mayoristas y comerciantes farmacéuticos, agencias militares y gubernamentales, organismos caritativos, y otras organizaciones de socorro y beneficencia a nivel mundial. Se requiere un pedido mínimo de RU £500.                                                                                                                                                                                                                                                                                                                             |
| IDA Foundation                         | IDA           | septiembre 2011   | 1,5%             | EXW<br>Amsterdam      | La Fundación IDA es una organización sin fines de lucro que apoya la atención médica en los países de ingresos bajos e intermedios, mejorando el acceso y suministrando medicamentos esenciales e insumos médicos de alta calidad. IDA es una fundación independiente y autosuficiente que distribuye más de 3.000 productos a más de 100 países alrededor del mundo. A los pedidos inferiores a los 5.000 euros se les cobra un cargo de manipuleo de 3% y los pedidos de más a los 5.000 euros se les cobra un cargo de manipuleo de 1,5%. Se requiere un pedido mínimo de 5000 \$EEUU. Los precios son indicativos y pueden cambiar. |

| El Servicio Mundial de Medicamentos Contra la Tuberculosis (Global TB Drug Facility) | GDF    | diciembre 2011    | 0%               | EXW                                                                                   | <p>Los medicamentos se adquieren como donativos gratuitos, pero también se ofrecen para la venta a gobiernos y organizaciones que desean valerse de la calidad, los precios y asistencia técnica/apoyo para la gestión de medicamentos que se ofrece a través del Servicio Directo de Adquisiciones GDF. El Servicio Mundial de Medicamentos Contra la Tuberculosis (GDF por sus siglas en Inglés) efectúa pruebas independientes obligatorias de cada lote de medicamentos que suministra, e inspecciones pre-embarque de cada orden que despacha para asegurar la más alta calidad. Además del costo de los medicamentos, los costos del control de calidad son pagados por el cliente (o por el GDF, en el caso de una donación).</p> <p>El GDF utiliza agentes de compra para asegurar la entrega eficiente de los productos. Un cargo por los servicios de compra es agregado al costo de la orden, que incluye el costo de los medicamentos, el de control de calidad y el de transporte. GDF envía al país un equipo de expertos en tuberculosis y en gestión de medicamentos 4 meses después del arribo de los medicamentos, para evaluar su uso y proporcionar la asistencia técnica que fuera requerida. Esta asistencia técnica del GDF a los países no tiene ningún costo. La GDF es un mecanismo para ampliar el acceso a, y la disponibilidad de, medicamentos de alta calidad contra la TB para facilitar la ampliación mundial del tratamiento directamente observado, a corto plazo (DOTS), la estrategia internacionalmente recomendada para el control de la tuberculosis.</p> |
| Supply Chain Management System                                                       | SCMS   | octubre 2011      | 5%               | EXW (Centro regional de distribución de SCMS o distribución directa por el proveedor) | <p>El proyecto “Sistema de Gestión de la Cadena de Suministro” (SCMS por sus siglas en inglés) distribuye medicamentos esenciales a programas de VIH/SIDA en todo el mundo. El proyecto ayuda a fortalecer las cadenas de suministro existentes, o establece nuevas para asegurar que un sistema de gestión del suministro seguro, confiable y sustentable, adquiera medicamentos y otros productos para personas con HIV/SIDA e infecciones relacionadas. SCMS ha sido fundado por el gobierno de los Estados Unidos como parte del Plan de Emergencia Presidencial para la Mitigación del SIDA (PEPFAR por sus siglas en inglés). SCMS puede trabajar en cualquier lugar del mundo, pero inicialmente se ha enfocado en los 15 países de PEPFAR. Además de servir a cualquier proyecto o socio apoyado por PEPFAR, SCMS puede proveer a proyectos apoyados por gobiernos nacionales y otros donantes, de acuerdo a arreglos individuales.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

# Formato de las Listas de Precios

Los productos farmacéuticos se presentan en tres listas separadas con formatos y características diferentes, aunque con ciertos elementos comunes a todas ellas.

- Lista I: Productos Clasificados por Orden Alfabético
- Lista II: Productos Clasificados por Categoría Terapéutica
- Lista III: Formularios para la Comparación de Precios

A continuación se presenta una descripción detallada de la información contenida en cada lista.

# Lista I – Productos Clasificados por Orden Alfabético

La Lista I tiene por objeto servir de referencia para la adquisición de medicamentos y los incluye en orden alfabético de sus nombres genéricos para poder localizar rápidamente cualquier medicamento. Esta lista muestra los tamaños de los paquetes disponibles de cada fuente y su precio en dólares estadounidenses, incluyendo los cargos regulares por servicio cuando corresponda.

## Descripción del producto

La descripción del producto incluye el nombre genérico, su potencia, la forma de la dosificación y la vía de administración. Si el producto emplea dos nombres comunes (por ejemplo, vitamina C y ácido ascórbico), uno de ellos aparecerá entre paréntesis. Véase la Lista de Sinónimos en el Anexo.

### IC

Los productos regulados por el control internacional de narcóticos se identifican con las siglas (IC) después de la descripción.

### Nomenclatura

Se han utilizado la denominación común internacional (INN) como la lista de los medicamentos incluidos en esta *Guía*. Si no se asigna un INN, entonces se emplea el nombre genérico más común. Las formas de dosificación de medicamentos indicadas suelen ser las que figuran en la 17<sup>o</sup> Lista Modelo de Medicamentos Esenciales de la Organización Mundial de la Salud (OMS) (revisada en marzo de 2011), y que se puede ver en <http://www.who.int/medicines>.

### Vía de administración

Las vías de administración se codifican en la forma siguiente:

| <b>Tipo de producto</b>                                      | <b>Código</b> |
|--------------------------------------------------------------|---------------|
| Condomes                                                     | COND          |
| Dispositivo intrauterino (DIU)                               | IUD           |
| Medicinas de uso local (líquidos, polvos, cremas, ungüentos) | TOP           |
| Medicinas inyectables                                        | INJ           |
| Medicinas para inhalación                                    | INH           |
| Medicinas por uso nasal y de la garganta                     | N/T           |
| Medicinas subcutáneas                                        | S/C           |
| No aplicable                                                 | N/A           |
| Preparaciones vaginales                                      | VAG           |
| Preparaciones para los ojos                                  | OPHT          |
| Preparaciones para los oídos                                 | OTIC          |
| Soluciones intravenosas                                      | IV            |
| Supositorios/enemas/ungüentos rectales                       | RECT          |

|                                        |      |
|----------------------------------------|------|
| Tabletas/cápsulas/líquidos de vía oral | PO   |
| Tabletas sublinguales                  | SL   |
| Tiras diagnósticas                     | DIAG |

## Fuente

La lista de fuentes de precios puede verse en la página S-9.

## Paquetes

Los proveedores y compradores proporcionan los tamaños de los paquetes.

## Precio de los paquetes (\$EE.UU.)

Los precios de los paquetes los proporcionan los proveedores y compradores y han sido convertidos a dólares estadounidenses a los tipos de cambio señalados en la página S-6, con objeto de facilitar las comparaciones. Si un proveedor cobra un porcentaje como cargo estándar por manejo, ese porcentaje ha sido añadido al precio de lista del paquete.

## Precio unitario (\$EE.UU.)

El precio unitario se calcula dividiendo el precio del paquete entre el número de unidades que contiene. De esta forma se facilita comparar los precios de los paquetes de diferentes vendedores. La unidad usada para comparar precios varía con el tipo de preparación farmacéutica, tal como sigue:

| <b>Forma de dosificación farmacéutica</b>            | <b>Unidad de comparación (Código)</b> |
|------------------------------------------------------|---------------------------------------|
| Ampolleta o frasco (mililitros)                      | Mililitro (ML)                        |
| Cartucho                                             | Mililitro (ML)                        |
| Condón, DIU (dispositivo intrauterino), prueba, red  | Cada (EACH)                           |
| Enema                                                | Mililitro (ML)                        |
| Frasco (potencia única)                              | Frasco (VIAL)                         |
| Gas                                                  | Metro cúbico (CUBMETER)               |
| Granules                                             | Gramme (G)                            |
| Inhalador                                            | Dosis (DOSE)                          |
| Jeringa                                              | Jeringa (SYRINGE)                     |
| Líquido de uso local                                 | Mililitro (ML)                        |
| Paquete                                              | Paquete (PACK)                        |
| Pesario                                              | Pesario (PESS)                        |
| Preparaciones para los oídos, la nariz y la garganta | Mililitro (ML)                        |
| Sólido de uso local                                  | Gramme (G)                            |
| Supositorio                                          | Supositorio (SUPP)                    |
| Suspensión o líquido oral                            | Mililitro (ML)                        |
| Tableta/cápsula                                      | Tableta/cápsula (TAB-CAP)             |
| Tratamiento                                          | Tratamiento (TREATMEN)                |
| Vacuna                                               | Dosis (DOSE)                          |

## Dosis diaria definida

La dosis diaria definida (DDD) es la dosis de mantenimiento promedio supuesta por día para un medicamento utilizado para su indicación principal en adultos. Cabe señalar que la dosis diaria definida es una unidad de medida y no necesariamente refleja la dosis diaria recomendada o recetada. Las dosis para pacientes individuales y grupos de pacientes con frecuencia diferirán de la DDD y necesariamente basarse en características individuales (por ejemplo, edad y peso) y consideraciones farmacocinéticas.

Los datos sobre el consumo de medicamentos presentados en las DDD ofrecen solamente una estimación aproximada del consumo y no dan una idea exacta del uso real. Las DDD proporcionan una unidad fija de medida independiente del precio y la formulación, que le permite al investigador determinar las tendencias en el consumo de medicamentos y hacer comparaciones entre los distintos grupos de población.

Las dosis diarias definidas fueron tomadas del Collaborating Centre for Drug Statistics Methodology de la OMS. Ellas ilustran las DDD recomendadas por el Grupo de Investigación sobre la Utilización de Medicamentos (DURG) de la Organización Mundial de la Salud. No todos los medicamentos listados en esta guía de comparación de precios tienen dosis diarias definidas asignadas por este método. La DDD solo se asigna a los medicamentos que ya tienen un código de clasificación anatómica-terapéutica-química (ATC).

La DDD se usa principalmente para hacer un cálculo estimado del consumo de los medicamentos, basado en datos de inventario y distribución. Esta estimación se puede combinar con la información sobre precios para fines de presupuestación.

**Nota:** La dosis diaria definida no se debe usar para determinar dosificación o terapias. Véase la información sobre recetas para los esquemas de dosificación para indicaciones específicas.

## WHO LME

La columna “WHO EML” indica si el producto está incluido en la Lista Modelo OMS de Medicamentos Esenciales de 2011. Identificamos cinco categorías en la *Guía Internacional de Indicadores de Precios de Medicamentos*:

- E = En la lista básica de la OMS, en la misma forma y potencia de dosificación
- C = En la lista complementaria de la OMS, en la misma forma y potencia de dosificación
- P = En la lista de la OMS, pero en una presentación diferente (forma y/o potencia de dosificación diferente)
- T = No está en la lista de la OMS, pero puede ser una alternativa para un producto listado como un ejemplo de grupo terapéutico
- N = No está en la lista modelo de la OMS

## Código ATC

El código ATC es el código de clasificación anatómica-terapéutica-química asignado por el Collaborating Centre for Drug Statistics Methodology de la OMS. El sistema ATC/DDD es una

herramienta usada para investigar la utilización de los medicamentos con objeto de mejorar la calidad en el uso de los mismos. Un componente de esto es la presentación y comparación de estadísticas sobre consumo de medicamentos al nivel internacional y a otros niveles.

En el sistema de clasificación ATC, los medicamentos se dividen en grupos diferentes conforme al órgano o sistema sobre el cual actúan, y a sus propiedades químicas, farmacológicas, y terapéuticas. Los medicamentos se clasifican en grupos a cinco niveles diferentes. También se dividen en 14 grupos principales (1r. nivel), con un subgrupo farmacológico/terapéutico (2do. nivel). Los niveles 3ro. y 4to. son subgrupos químicos/farmacológicos/terapéuticos, y el 5to. nivel es la sustancia química.<sup>2</sup>

## Precio mediano

Cuando se use la *Guía* para hacer comparaciones con precios locales, o para calcular el valor total de una lista de adquisición, un precio promedio puede ser útil. Básicamente hay dos clases de precios promedio que podrían usarse—el precio medio y el precio mediano. El precio medio es el promedio simple de todos los precios mostrados para un medicamento; los valores se suman y luego se dividen entre la cantidad de valores.

Sin embargo, surge un problema cuando uno o dos precios son mucho más altos o más bajos que los demás en un medicamento determinado. Estos “valores extremos” producen una desviación en el valor medio y lo hacen menos representativo. Por ejemplo, en una serie de siete valores, tales como \$1, \$2, \$2, \$3, \$5, \$16 y \$20, todos los valores suman \$49, y dividiendo este número entre siete se obtiene un valor medio de \$7. Para fines de comparación o de estimados, es probable que este promedio sea demasiado alto debido a los dos precios mucho más altos que los demás de la serie. Para evitar este riesgo, usamos el precio mediano.

El precio mediano es un tipo de promedio; es el valor que divida una serie de valores a la mitad cuando la serie se pone en orden ascendente. Esto probablemente sea un método más útil para estimar los precios futuros reales (o para hacer comparaciones con precios locales) cuando exista una distribución sesgada.

Si hay un número impar de valores en la serie, como el ejemplo anterior, el valor mediano es el valor del medio en la serie (\$3 en el ejemplo anterior). Cuando una serie contiene un número par de valores, como en la serie \$1, \$3, \$4, \$6, \$14 y \$20, el precio mediano se calcula promediando los dos valores del medio. En este ejemplo, el precio mediano es el promedio de \$4 y \$6, o sea, \$5. Nuevamente, es probable que esto se aproxime más a la realidad para la comparación o estimación, que la media aritmética de \$8 (\$48 dividido entre 6).<sup>3</sup>

## Proporción máxima/mínima

La proporción máxima/mínima (high/low) compara el precio unitario más alto con el precio unitario más bajo. Por ejemplo, una proporción máxima/mínima de tres significa que el precio unitario más alto es tres veces mayor que el precio unitario más bajo.

<sup>2</sup> Tomado del sitio del Collaborating Centre for Drug Statistics Methodology de la OMS en la Web en <http://www.whocc.no/atcddd/>.

# Lista II – Productos Clasificados por Categoría Terapéutica

En Lista II, los medicamentos se muestran en orden alfabético dentro de cada clase terapéutica partiendo del sistema de clasificación de la Lista de Medicamentos Esenciales de la Organización Mundial de la Salud. Para los productos no incluidos en la LME más reciente de la OMS (es decir, los identificados con una “N” en la columna “LME de la OMS” en esta *Guía*), hemos asignado una clase terapéutica basada en el sistema de clasificación utilizada por la LME de la OMS. Esta clase se utiliza cuando, de acuerdo con una determinación hecha por el personal de MSH, un producto no incluido en la LME corresponde claramente a una categoría terapéutica de la LME.

Esta asignación no refleja una decisión del Departamento de Medicinas Esenciales y Política Farmacéutica de la OMS, ni del personal de MSH, de que el producto no incluido en la LME pueda incluirse en la Lista de Medicinas Esenciales de la OMS. Si no es posible hacer una asignación inequívoca de una categoría terapéutica de la LME, clasificamos el producto en la categoría “UA– Agentes No Clasificados en la LME de la OMS”.

Los productos en un mismo grupo no implica que son directamente sustituibles entre ellos. Todos los precios que figuran en esta lista son unitarios. Por cada producto de la lista se muestran los datos siguientes:

## Descripción del producto

La descripción del producto incluye el nombre genérico, su potencia, forma de dosificación y la vía de administración. Si el producto emplea dos nombres comunes (por ejemplo, vitamina C y ácido ascórbico), uno de ellos aparecerá entre paréntesis. Véase la Lista de Sinónimos en el Anexo.

### IC

Los productos regulados por el control internacional de narcóticos se identifican con las siglas (IC) después de la descripción.

### Nomenclatura

Se han utilizado las denominaciones comunes internacionales (INN) como la lista de los medicamentos incluidos en esta *Guía*. Si no se asigna un INN, entonces se emplea el nombre genérico más común. Las formas de dosificación de los medicamentos indicadas generalmente son las que figuran en la 17ª. Lista Modelo OMS de Medicamentos Esenciales (revisada en marzo de 2011), y que se puede ver en <http://www.who.int/medicines>.

### Vía de administración

Las vías de administración se codifican en la forma siguiente:

#### Tipo de producto

Condomes  
Dispositivo intrauterino (DIU)

#### Código

COND  
IUD

|                                                              |      |
|--------------------------------------------------------------|------|
| Medicinas de uso local (líquidos, polvos, cremas, ungüentos) | TOP  |
| Medicinas inyectables                                        | INJ  |
| Medicinas para inhalación                                    | INH  |
| Medicinas por uso nasal y de la garganta                     | N/T  |
| Medicinas subcutáneas                                        | S/C  |
| No aplicable                                                 | N/A  |
| Preparaciones vaginales                                      | VAG  |
| Preparaciones para los ojos                                  | OPHT |
| Preparaciones para los oídos                                 | OTIC |
| Soluciones intravenosas                                      | IV   |
| Supositorios/enemas/ungüentos rectales                       | RECT |
| Tabletas/cápsulas/líquidos de vía oral                       | PO   |
| Tabletas sublinguales                                        | SL   |
| Tiras y pruebas diagnósticas                                 | DIAG |

## WHO LME

La columna “WHO EML” indica si el producto está incluido en la Lista Modelo OMS de Medicamentos Esenciales de 2011. Identificamos cinco categorías en la *Guía Internacional de Indicadores de Precios de Medicamentos*:

- E = En la lista básica de la OMS, en la misma forma y potencia de dosificación
- C = En la lista complementaria de la OMS, en la misma forma y potencia de dosificación
- P = En la lista de la OMS, pero en una presentación diferente (forma y/o potencia de dosificación diferente)
- T = No está en la lista de la OMS, pero puede ser una alternativa para un producto listado como un ejemplo de grupo terapéutico
- N = No está en la lista modelo de la OMS

## Número de proveedores/compradores

El número de proveedores o compradores que ofrecen este producto.

## Precio mediano

Cuando se use la *Guía* para hacer comparaciones con precios locales, o para calcular el valor total de una lista de adquisición, un precio promedio puede ser útil. Básicamente hay dos clases de precios promedio que podrían usarse—el precio medio y el precio mediano. El precio medio es el promedio simple de todos los precios mostrados para un medicamento; los valores se suman y luego se dividen entre el número de valores.

Sin embargo, surge un problema cuando uno o dos precios son mucho más altos o más bajos que los demás en un medicamento determinado. Estos “valores extremos” producen una desviación en el valor medio y lo hacen menos representativo. Por ejemplo, en una serie de siete

valores, tales como \$1, \$2, \$2, \$3, \$5, \$16 y \$20, todos los valores suman \$49, y dividiendo este número entre siete se obtiene un valor medio de \$7. Para fines de comparación o de estimados, es probable que este promedio sea demasiado alto debido a los dos precios que son mucho más altos que los demás en la serie. Para evitar este riesgo, usamos el precio mediano.

El precio mediano es un tipo de promedio; es cualquier valor que divide una serie de valores a la mitad cuando la serie se pone en orden ascendente. Esto probablemente sea un método más útil para estimar los precios futuros reales (o para hacer comparaciones con precios locales) cuando exista una distribución sesgada.

Si hay un número impar de valores en la serie, como el ejemplo anterior, el valor mediano es el valor del medio en la serie (\$3 en el ejemplo anterior). Cuando una serie contiene un número par de valores, como en la serie \$1, \$3, \$4, \$6, \$14 y \$20, el precio mediano se calcula promediando los dos valores del medio. En este ejemplo, el precio mediano es el promedio de \$4 y \$6, o sea, \$5. Nuevamente, es probable que esto se aproxime más a la realidad para la comparación o estimación, que la media aritmética de \$8 (\$48 dividido entre 6).<sup>4</sup>

## Precio más alto

El precio más alto de los proveedores y compradores de la lista.

## Precio más bajo

El precio más bajo de los proveedores y compradores de la lista.

## Proporción máxima/mínima

La proporción máxima/mínima (high/low) compara el precio unitario más alto con el precio unitario más bajo. Por ejemplo, una proporción máxima/mínima de tres significa que el precio unitario más alto es tres veces mayor que el precio unitario más bajo.

## Dosis diaria definida (DDD)

La dosis diaria definida es la dosis de mantenimiento promedio supuesta por día para un medicamento utilizado para su indicación principal en adultos.

Cabe señalar que la dosis diaria definida es una unidad de medida y no necesariamente refleja la dosis diaria recomendada o recetada. Las dosis para pacientes individuales y grupos de pacientes con frecuencia diferirán de la DDD y necesariamente basarse en características individuales (por ejemplo, edad y peso) y consideraciones farmacocinéticas.

Los datos sobre el consumo de medicamentos presentados en las DDD ofrecen solamente una estimación aproximada del consumo y no dan una idea exacta del uso real. Las DDD proporcionan una unidad fija de medida independiente del precio y la formulación, que le

<sup>4</sup>Para ver más discusiones sobre el tema, ver *Statistics without Tears—A Primer for Non-Mathematicians*, por Derek Rowntree (Nueva York: Charles Scribner's Sons, 1981), pp. 41–45.

permite al investigador determinar las tendencias en el consumo de medicamentos y hacer comparaciones entre los distintos grupos de población.

Las dosis diarias definidas fueron tomadas del Collaborating Centre for Drug Statistics Methodology de la OMS. Ellas ilustran las DDD recomendadas por el Grupo de Investigación sobre la Utilización de Medicamentos (DURG) de la Organización Mundial de la Salud. No todos los medicamentos listados en esta guía de comparación de precios tienen dosis diarias definidas asignadas por este método. La DDD solo se asignará a los medicamentos que ya tienen un código de ATC.

El uso principal de la DDD es para hacer un cálculo estimado del consumo de los medicamentos, basado en datos de inventario y distribución. Esta estimación se puede combinar con la información sobre precios para fines de presupuestación.

**Nota:** La dosis diaria definida no se debe usar para determinar dosificaciones o terapias. Véase la información sobre recetas para los esquemas de dosificación para indicaciones específicas.

# Lista III – Formulario para la Comparación de Precios

El propósito de esta lista es ayudar al usuario a comparar sus precios con los de la *Guía*. En ella solo se muestra el precio mediano, y se emplea una descripción abreviada del producto.

## Descripción del producto

La descripción del producto incluye el nombre genérico, su potencia, forma de dosificación y la vía de administración. Si el producto emplea dos nombres comunes (por ejemplo, vitamina C y ácido ascórbico), uno de ellos aparecerá entre paréntesis. Véase la Lista de Sinónimos en el Anexo.

### IC

Los productos regulados por el Control Internacional de Narcóticos se identifican con las siglas (IC) después de la descripción.

### Nomenclatura

Se han utilizado las denominaciones comunes internacionales (INN) como la lista de los medicamentos incluidos en esta *Guía*. Si no se asigna un INN, entonces se emplea el nombre genérico más común. Las formas de dosificación de medicamentos indicadas suelen ser las que figuran en la 17ª. Lista Modelo de Medicinas Esenciales de la Organización Mundial de la Salud (revisada en marzo de 2011), y que se puede ver en <http://www.who.int/medicines>.

## WHO LME

La columna “WHO EML” indica si el producto está incluido en la Lista Modelo OMS de Medicamentos Esenciales de 2011. Identificamos cinco categorías en la *Guía Internacional de Indicadores de Precios de Medicamentos*:

- E = En la lista básica de la OMS, en la misma forma y potencia de dosificación
- C = En la lista complementaria de la OMS, en la misma forma y potencia de dosificación
- P = En la lista de la OMS, pero en una presentación diferente (forma y/o potencia de dosificación diferente)
- T = No está en la lista de la OMS, pero puede ser una alternativa para un producto listado como un ejemplo de grupo terapéutico
- N = No está en la lista modelo de la OMS

## Tamaño del paquete

Este espacio en blanco es para que el usuario apunte el tamaño del paquete que está comprando.

## Precio del paquete

Este espacio en blanco es para que el usuario apunte el precio del paquete comprado que anotó en el espacio en blanco anterior.

## Precio unitario

El usuario debe calcular su precio unitario dividiendo el precio del paquete entre el número de unidades que contiene el paquete. Se indican las unidades de comparación empleadas en la *Guía* para cada producto con objeto de asegurar que los precios se comparen sobre una base equivalente.

## Precio unitario mediano de un proveedor o comprador (\$EE.UU.)

El precio unitario se calcula dividiendo el precio del paquete entre el número de unidades que contiene el paquete. La unidad utilizada para comparar los precios varía según el tipo de preparación farmacéutica, como sigue:

### Forma de dosificación farmacéutica

Ampolleta o frasco (mililitros)  
Cartucho  
Condón, DIU (dispositivo intrauterino),  
prueba, o red  
Enema  
Frasco (potencia única)  
Gas  
Granules  
Inhalador  
Jeringa  
Líquido de uso local  
Paquete  
Pesario  
Preparaciones para los oídos, la nariz  
y la garganta  
Sólido de uso local  
Supositorio  
Suspensión o líquido oral  
Tableta/cápsula  
Tratamiento  
Vacuna

### Unidad de comparación (Código)

Mililitro (ML)  
Mililitro (ML)  
Cada (EACH)  
Mililitro (ML)  
Frasco (VIAL)  
Metro cúbico (CUBMETER)  
Gramme (G)  
Dosis (DOSE)  
Jeringa (SYRINGE)  
Mililitro (ML)  
Paquete (PACK)  
Pesario (PESS)  
Mililitro (ML)  
Gramme (G)  
Supositorio (SUPP)  
Mililitro (ML)  
Tableta/cápsula (TAB-CAP)  
Tratamiento (TREATMEN)  
Dosis (DOSE)

El precio mediano es un tipo de promedio; es el valor que divide una serie de valores a la mitad cuando la serie se pone en orden ascendente. Es probable que esto sea más valioso para calcular los precios futuros (o comparar con precios locales), cuando existe una distribución sesgada.

Si hay un número impar de valores en la serie, como \$1, \$2, \$2, \$3, \$5, \$16 y \$20, el valor mediano es el valor del medio en la serie (\$3 en el ejemplo). Cuando una serie contiene un número par de valores, como en la serie \$1, \$3, \$4, \$6, \$14 y \$20, el precio mediano se calcula promediando los dos valores del medio. En este ejemplo, el precio mediano es el promedio de \$4 y \$6, o sea, \$5. Nuevamente, es probable que esto se aproxime más a la realidad para la comparación o estimación, que la media aritmética de \$8 (\$48 dividido entre 6).<sup>5</sup>

<sup>5</sup> Para ver más discusiones sobre el tema, ver *Statistics without Tears—A Primer for Non-Mathematicians*, por Derek Rowntree (Nueva York: Charles Scribner's Sons, 1981), pp. 41–45.

# Cómo Analizar y Comparar sus Precios

La comparación de los precios que usted ha pagado con los precios internacionales es uno de los indicadores más fundamentales para evaluar la eficiencia de la adquisición. Otros indicadores clave de la eficiencia de la adquisición son la precisión del estimado de necesidades, la puntualidad de las entregas y la calidad de los productos adquiridos.

Con la ayuda de esta *Guía*, los funcionarios de las oficinas de adquisiciones pueden comparar los precios que pagan con los precios internacionales de referencia (vea el Formulario de Comparación de Precios, SP-1 y BP-1). La metodología que se describe a continuación presenta una manera de hacer esas comparaciones. Usted tal vez desee visitar la versión electrónica de la *Guía Internacional de Indicadores de Precios de Medicamentos* en el Centro de Recursos Electrónicos en <http://erc.msh.org/priceguide>. Éste contiene sugerencias que le ayudarán a comparar sus precios con los de la *Guía* y a planificar un presupuesto o licitación.

1. Haga una lista de los productos que compra rutinariamente en grandes cantidades, o que representan un gran porcentaje del presupuesto.
2. Por cada producto, anote el tamaño del paquete de venta utilizado y el precio más reciente de este tamaño de paquete. Asegúrese de ver si el precio es CIF (costo, seguro y flete); FOB (franco a bordo, transporte hasta el puerto de salida); EXW (franco en almacén, sin transporte), u otro tipo de precio. Los precios pueden requerir ajustes para que se puedan comparar con exactitud.
3. Dependiendo del tipo de precios que usted esté comparando, seleccione uno de los dos formularios de comparación de precios incluidos en la *Guía*. Los precios de compradores incluyen costos de transporte y posiblemente sean más apropiados si representan una región del mundo y valor de licitación similar a la suya. Los precios del proveedor son FOB y EXW, y se deben ajustar para que reflejen los cargos acostumbrados por embarque, manejo, y seguro apropiados a su situación.
4. En uno de los formularios para la comparación de precios, seleccione el producto en esta *Guía* que corresponda más estrechamente a su producto. Si los precios que está usando localmente son CIF y ha seleccionado el formulario de comparación de comprador, no será necesario hacer ajustes en ninguno de los dos grupos de precios.

Si los precios que está usando localmente son CIF y ha seleccionado la lista de comparación de proveedores, sugerimos ajustar hacia arriba los precios proporcionados en la lista de proveedores a fin de reflejar la diferencia entre los precios CIF y EXW/FOB. Cuando los precios de esta lista sean FOB o EXW, es razonable agregar del 10% al precio de lista en concepto de flete y seguro, dependiendo de la distancia y el modo de transporte. A los precios de esta lista ya se han agregado los porcentajes usuales cobrados por manejo.

Cuando ocurran fluctuaciones considerables en los tipos cambiarios, se deben ajustar los precios para que reflejen esos cambios.

5. Una vez que se hayan ajustado los precios de los paquetes para reflejar los costos de flete, seguro y otros costos adicionales, divida el precio del paquete entre el número de unidades

de comparación contenidas en el paquete de venta (por ejemplo, divida el precio del paquete entre 1000 si el paquete es una botella de 1000 tabletas, o entre 100 si es un frasco de 100 ml). Asegúrese que la unidad de comparación utilizada sea la misma que viene en la lista de la *Guía*. Para su conveniencia, el precio unitario mediano internacional aparece en los dos formularios de comparación de precios.

Debido a que el empaque puede aumentar considerablemente los costos de un producto, es preciso tener cuidado al comparar los precios unitarios entre paquetes diferentes. Por ejemplo, el precio unitario de empaques en tiras suele ser más alto que el precio unitario de tabletas empacadas en una botella de 1000. Los precios de la *Guía* no cubren empaques especiales, excepto cuando se indique.

Un análisis de este tipo incluye muchas hipótesis que afectan a su resultado. Las comparaciones de precios internacionales identifican diferencias extremas en los precios, tanto altas como bajas. Una proporción extremadamente alta entre los precios disponibles localmente y los mostrados en esta *Guía*, puede indicar que hay disponible una fuente menos costosa. Si los precios disponibles localmente son mucho más bajos que los de esta *Guía*, ello podría reflejar una adquisición eficaz, pero también pudiera ser el resultado de un comprometimiento entre el control de calidad, las diferencias en empaques u otros factores que pudieran reducir la calidad del producto. Estas comparaciones solamente son indicadores y debieran considerarse como sugerencias para investigar más exhaustivas.

povidone  
procaine penicillin  
pyridoxine  
retinol

## Name as Listed in the Guide

paracetamol  
epinephrine  
vitamin C  
acetylsalicylic acid  
zidovudine  
bendroflumethiazide  
penicillin, benzathine benzyl  
trihexyphenidyl  
benzatropine  
penicillin, benzyl  
hyoscine butylbromide  
charcoal, activated  
chlorphenamine  
vitamin D-3  
vitamin B-12  
epirubicin  
vitamin D  
alcohol  
antihemophilic factor  
furosemide  
lindane  
dextrose  
polygeline  
sodium lactate compound  
vitamin B-12  
hydroxycarbamide  
isoniazid  
insulin, neutral soluble (regular)  
insulin, isophane (NPH)  
ipecacuanha syrup  
insulin, zinc suspension (lente)  
insulin, isophane (NPH)  
lidocaine  
glyceryl trinitrate  
sodium chloride 0.9%  
penicillin, benzathine benzyl  
penicillin, benzyl  
penicillin, phenoxymethyl  
penicillin, phenoxymethyl  
phenobarbital  
penicillin, phenoxymethyl  
vitamin K-1  
PVP iodine  
penicillin, procaine benzyl  
vitamin B-6  
vitamin A

### Synonym

Ringer's lactate  
stilboestrol  
succinylcholine  
sulfamethoxazole & trimethoprim  
thiamine  
thiopentone  
thyroxine sodium

### Name as Listed in the *Guide*

sodium lactate compound  
diethylstilbestrol  
suxamethonium  
co-trimoxazole (smz/tmp)  
vitamin B-1  
thiopental sodium  
levothyroxine sodium

# About Management Sciences for Health

Management Sciences for Health (MSH) is an international nonprofit organization, dedicated to closing the gap between what is known about the overwhelming public health challenges facing many nations and what is done to address those challenges.

Since 1971, MSH has worked in more than 140 countries with policymakers, health professionals, and health care consumers to improve the quality, availability, and affordability of health services. We work with governments, donors, nongovernmental organizations, and health agencies to respond to priority health problems such as HIV & AIDS, tuberculosis, malaria, maternal-child health, and reproductive health. Our publications and electronic products augment our assistance in these technical areas.

MSH's staff of more than 2,200 from over 70 nations work in its Cambridge, Massachusetts, headquarters; offices in the Washington, DC, area; and more than 30 country offices. Through technical assistance, research, training, and systems development, MSH is committed to making a lasting difference in global health.

# About the MSH Center for Pharmaceutical Management

MSH has more than 30 years of experience in establishing, managing, and evaluating pharmaceutical sector activities in developing countries. In 1983, the MSH Drug Management Program (DMP) was established in recognition of the key role that pharmaceuticals play in delivering high-quality health care in developing countries.

In 2001, the DMP was restructured as the Center for Pharmaceutical Management (CPM). The center, building on the work of the DMP, remains committed to providing high-quality technical assistance and training in pharmaceutical management worldwide.

The key to MSH's success in providing technical assistance in pharmaceutical management is our proven ability to work closely with both senior- and operations-level personnel in developing countries, while maintaining strong working relationships with the many international agencies and donors sponsoring our work. These donors include USAID, WHO, PAHO, UNICEF, Danida, the World Bank, and foundations such as the Bill & Melinda Gates Foundation and the Rockefeller Foundation.

CPM has nearly 700 staff members working out of its primary office in the Washington, D.C., area and other locations worldwide, together with a roster of more than 50 expert consultants, who are available as required. For more information on CPM, please contact:

# Acerca de Management Sciences for Health

Management Sciences for Health (MSH) es una organización privada sin fines de lucro dedicada a cerrar la brecha entre lo que se sabe acerca de los retos de salud pública de muchas naciones y lo que se hace por resolverlos.

Desde 1971, MSH ha trabajado en más de 140 países, con personal de políticas, profesionales de salud y consumidores de servicios de atención de salud para mejorar la calidad, la disponibilidad y la accesibilidad financiera de los servicios de salud. Trabajamos con los gobiernos, los donantes, las organizaciones no gubernamentales, y las agencias de salud para responder a los problemas prioritarios de salud como el VIH & SIDA, la tuberculosis, el paludismo, la supervivencia maternal-infantil y la salud reproductiva. Nuestros productos electrónicos y publicaciones complementan nuestra asistencia en estas áreas técnicas.

El cuadro de MSH que suma más de 2200 personas de más de 70 naciones trabaja en su sede en Cambridge, Massachusetts, oficinas en los alrededores de Washington, DC y más de 30 oficinas en el terreno. A través de sus investigaciones, asistencia técnica, capacitación y desarrollo de sistemas, MSH se compromete a hacer una diferencia duradera en la salud global.

# Acerca del Centro de Gestión Farmacéutica de MSH

MSH tiene más de 30 años de experiencia en el desarrollo, gerencia y evaluación de las actividades del sector farmacéutico en los países en desarrollo. En 1983 creó su programa de gestión farmacéutica (*Drug Management Program*, o DMP), por reconocer el papel esencial de los medicamentos en proporcionar atención médica de calidad en los países en desarrollo.

En 2001 DMP se transformó en el actual Centro de Gestión Farmacéutica (*Center for Pharmaceutical Management*, o CPM), que continúa la labor iniciada por DMP a nivel mundial y su dedicación a proporcionar asistencia técnica y capacitación de alta calidad sobre este tema.

El éxito de MSH en su asistencia técnica sobre la gestión farmacéutica, se debe a su demostrada capacidad para colaborar estrechamente—tanto con el personal de alto nivel, como con el personal operativo en los países en desarrollo—y mantener una sólida relación de trabajo con las diversas organizaciones internacionales y donantes que patrocinan sus actividades. Estos donantes incluyen USAID, OMS, OPS, UNICEF, Danida, el Banco Mundial y fundaciones como la Bill & Melinda Gates y la Rockefeller.

CPM tiene cerca de 700 personas asignadas en su oficina principal en el área metropolitana de Washington, D.C., y en otros lugares por todo el mundo, y cuenta con una lista de más de 50 consultores especializados, que prestan sus servicios cuando estos son necesarios. Para más información sobre CPM, por favor comuníquese con:

# A propos de Management Sciences for Health

Management Sciences for Health (MSH) est une organisation internationale à but non lucratif, qui cherche à combler l'écart entre ce que l'on connaît des énormes défis de santé publique qui confrontent de nombreuses nations et ce que l'on fait pour les adresser.

Depuis 1971, MSH a travaillé dans plus de 140 pays avec des décideurs, des professionnels de la santé et des clients des services de santé pour améliorer la qualité et la disponibilité des services de santé, et pour en réduire le coût. Nous collaborons avec les gouvernements, les bailleurs au fonds, les organisations non gouvernementales, et les agences de santé pour répondre aux problèmes prioritaires de santé, tels que le VIH & SIDA, la tuberculose, le paludisme, la santé maternel-enfantine, et la santé de la reproduction. Nos publications et nos produits électroniques sont une forme supplémentaire d'assistance dans ces domaines techniques.

MSH emploie plus de 2200 personnes provenant de plus de 70 nations ; MSH a son siège à Cambridge, dans le Massachusetts, et des bureaux dans les environs de Washington DC ainsi que dans plus de 30 pays. En fournissant assistance technique, recherche, formation, et en développant des systèmes, MSH s'engage à faire une différence durable dans la santé mondiale.

# A propos du Centre MSH pour la Gestion des Médicaments

MSH a plus de 30 années d'expérience en ce qui concerne la mise sur pied, la gestion et l'évaluation d'activités du secteur pharmaceutique dans des pays en développement. En 1983, le Programme de Gestion des Médicaments (DMP) de MSH était créé au regard de l'importance cruciale que détiennent les produits pharmaceutiques dans la prestation de soins de santé de qualité dans des pays en développement.

En 2001, le DMP était restructuré donnant naissance au Centre pour la Gestion des Médicaments (CPM). Le Centre, fidèle aux travaux du DMP, reste engagé à fournir une assistance technique et formation de qualité en matière de gestion pharmaceutique dans le monde entier.

MSH sait apporter une assistance technique efficace en matière de gestion pharmaceutique car nous sommes capables de travailler en étroite collaboration avec les cadres supérieurs et opérationnels dans des pays en développement tout en maintenant de relations fortes de travail avec les nombreuses organisations internationales et bailleurs de fonds parrainant nos activités. Ces bailleurs comprennent l'USAID, l'OMS, l'OPS, l'UNICEF, Danida, la Banque mondiale et des fondations telles que la Fondation Bill & Melinda Gates et la Fondation Rockefeller.

CPM compte-t-il près de 700 membres de personnel travaillant à partir de ses bureaux principaux dans la région de Washington, DC, et d'autres endroits mondiaux de pair avec un groupe de plus de 50 consultants hautement spécialisés intervenant de manière ponctuelle.

# International Drug Price Indicator Guide

MSH's *International Drug Price Indicator Guide* provides an indication of drug prices on the international market. Updated annually, this *Guide* contains a spectrum of prices from drug suppliers and procurement agencies based on their current price lists. It also contains prices obtained from international development organizations and government agencies. Comparative price information is important for getting the best price, and this is an essential reference for anyone involved in the procurement of pharmaceuticals.

The 2011 edition of the *International Drug Price Indicator Guide* was produced in collaboration with the World Health Organization.

The *Guide* is also available on MSH's Electronic Resource Center at <http://erc.msh.org>.

*"As a health economist working on drug policy issues, I find the MSH International Drug Price Indicator Guide invaluable..."*

— Research Fellow, London School of Hygiene & Tropical Medicine

*"This Guide has become an indispensable tool in our efforts here to promote rational drug use."*

— Physician, National Drug Information Center, College of Medicine, the Philippines

---

## Managing Drug Supply:

Managing Access to Medicines and other Health Technologies

Third Edition

Working with authors from around the world, MSH has revised its seminal publication on global pharmaceutical management. Its 52 updated chapters provide an overview and specific suggestions for effectively managing pharmaceutical systems. The publication includes six new chapters on pharmacovigilance, traditional medicines, intellectual property, and other cutting-edge topics. *MDS-3* is available on CD-ROM and online at [www.msh.org](http://www.msh.org).
